EDITORIAL BOARD

Mathematics Education Editor

Nihat Boz, Gazi University, TURKEY

Educational Science Editor

Alfiya R. MASALIMOVA, Kazan (Volga region) Federal University, Kazan, RUSSIA

Editorial Board Members

Amy J. HACKENBERG, Indiana University Bloomington, USA

Andy NORTON, Virginia Tech, USA

Bulent GUVEN, Karadeniz Technical University, TURKEY

Carmen BATANERO, Universidad de Granada, SPAIN

James W. WILSON, University of Georgia, USA

Lyn ENGLISH, Queensland University of Technology, AUSTRALIA

Olive Chapman, University of Calgary, CANADA

Pat HERBST, University of Michigan, USA

Patricia WILSON, University of Georgia, USA

Ruhama EVEN, The Weizmann Institute of Science, ISRAEL

Susanne PREDIGER, TU Dortmund University, GERMANY

Albina R. SHAIDULLINA, Almet'yevsk State Oil Institute, Almet'yevsk, RUSSIA

Venera G. ZAKIROVA, Kazan (Volga region) Federal University, Kazan, RUSSIA

AUTHOR GUIDELINES

Review Process and Peer Review Policy

Manuscripts are reviewed initially by the Editors and only those meeting the aims and scope of the journal will be sent for outside review. Each manuscript is reviewed by at least two referees.

IEJME-Mathematics Education operates a strictly blinded peer review process in which the reviewer's name is withheld from the author and the author's name from the reviewer.

Manuscript Presentation

The journal's language is English. Manuscripts should not exceed for qualitative studies 60 pages and for quantitative studies 50 pages of printed text, including references, tables and figures. The manuscript should be modified APA Referencing System. References should follow the American Psychological Association (APA) (Sixth Edition) style in alphabetical order.

Figures

All photographs, graphs and diagrams should be referred to as a Figure and they should be numbered consecutively (1, 2, etc.). Multi-part figures ought to be labeled with lower case letters (a, b, etc.). Please insert keys and scale bars directly in the figures. Relatively small text and great variation in text sizes within figures should be avoided as figures are often reduced in size. Figures may be sized to fit approximately within the column(s) of the journal. Provide a detailed legend (without abbreviations) to each figure, refer to the figure in the text and note its approximate location in the margin. Please place the legends in the manuscript after the references.

Tables

Each table should be numbered consecutively. In tables, footnotes are preferable to long explanatory material in either the heading or body of the table. Such explanatory footnotes, identified by superscript letters, should be placed immediately below the table. Please provide a caption (without abbreviations) to each table, refer to the table in the text and note its approximate location in the margin. Finally, please place the tables after the figure legends in the manuscript.

Figures and tables should have their positions clearly marked and be provided after the references in the main text.

Notes

Please use endnotes rather than footnotes. Notes should be indicated by consecutive superscript numbers in the text and listed at the end of the article before the References. A source reference note should be indicated by means of an asterisk after the title. This note should be placed at the bottom of the first page.

Acknowledgements

Acknowledgements of people, grants, funds, etc. should be placed in a separate section before the References.

Appendices

Supplementary material should be collected in an Appendix.

Quotations

Quotations less than three lines long should be incorporated into the text using double quotation marks. For longer quotations (more than three lines or two sentences), use 'Quotation' style in the styles menu.

Manuscript submission

Manuscripts for consideration should be submitted via the online submission system <http://www.editorialsystem.com/mathedu>. The first time authors need to register in the system to be able to submit their articles.

In case of difficulties, please contact the executive editor (editor@lookacademy.nl)

Proofs

A proof will be sent to the corresponding author.

Copyright

Everyone is able to download, copy and share open access articles. We provide authors with a choice of publishing under either the Creative Commons licenses CC-BY or the Creative Commons CC-BY-NC-ND user license.

Permissions

It is the responsibility of the author to obtain written permission for a quotation from unpublished material, or for all quotations in excess of 250 words in one extract or 500 words in total from any work still in copyright, and for the reprinting of figures, tables, or poems from unpublished or copyrighted material.

English Language Editing Service

Authors who are non-English speaking should consider using a professional editing service. A clear and concise language will help editors and reviewers concentrate on the scientific content of your paper and thus smooth the peer review process. The following editing service provides language editing for scientific articles:

[WriteAssist](#)

Publication Ethics

Mathematics Education journal is a member of CrossCheck, an initiative to help editors verify the originality of submitted manuscripts. As part of this process, all manuscripts submitted are scanned and compared with the CrossCheck database. The Mathematics Education supports the ethical principles set out by [the Committee on Publication Ethics \(COPE\)](#).

All authors must confirm the following before the submission of manuscript:

- All submitted manuscripts must be the work of the original author(s).
- We only accept unpublished manuscript.
- If part of data has been used in any other publication or presentation please inform the editor about this when submitting.
- It is unethical to submit a manuscript to more than one journal concurrently.
- There should be no conflict of interest, if any it must be clearly stated.
- Authors should acknowledge the sources of data used in the preparation of the manuscript.
